Executive Summary & Project Overview

Skyline Meridian Residences stands as Aurora Crest Developments' most ambitious residential undertaking — a landmark luxury high-rise township commanding 38 acres of prime land in Sector 84, Gurugram. Conceived as a vertical city within a city, the project integrates world-class residential living with cutting-edge smart infrastructure, verdant landscaped plazas, and curated lifestyle experiences designed for the discerning urban professional.

Vision Statement

The overarching vision is to set a new benchmark for premium residential living in the National Capital Region — a community where architectural grandeur meets operational intelligence. Each design element has been engineered to deliver comfort, security, and sustainable luxury simultaneously, fulfilling the aspirations of a generation that demands more than just a home.

Location Analysis & Connectivity

Project Location: Gurugram, Haryana | Micro-Market: Sector 84 (Dwarka Expressway Corridor)

Distance & Connectivity Matrix

Destination', 'Distance / Travel Time']	
IGI Airport	28 km / ~35 min via NH-48
Dwarka Expressway Metro (proposed)	1.2 km walking
Cyber City / DLF Phase-II	18 km / 25 min
NH-48 (Delhi–Jaipur Highway)	2.4 km
SPR (Southern Peripheral Road)	3.8 km
IFFCO Chowk Metro	14 km
Rajiv Chowk, NDLS	32 km / 40 min

Key Social Infrastructure Nearby

- Medanta – The Medicity (8 km)
- Amity International School (4 km)
- Ambience Mall, Gurugram (11 km)
- Cyber Hub Entertainment District (19 km)
- Golf Course Extension Road (7 km)
- International Tech Park Gurugram (5 km)

Micro-Market Commentary

Sector 84 sits at the confluence of two of Gurugram's most significant arterial corridors — the Dwarka Expressway and the Southern Peripheral Road. The area has witnessed a 62% surge in residential demand over 2019–2024 as infrastructure investments accelerated. DMIC (Delhi-Mumbai Industrial Corridor) proximity further anchors long-term economic growth in this micro-market.

03

Architecture & Master Plan

Design Philosophy

The towers are designed by internationally acclaimed architectural firm Elara Associates, drawing inspiration from the crystalline skyline of Singapore and the vertical garden concepts of Milan. The façade employs double-skin unitised curtain wall systems with low-E solar control glass, dramatically reducing solar heat gain while maximising natural daylighting. The overall form responds dynamically to sun path analysis — each tower is rotated 5–12° from a true north orientation to optimise wind cross-ventilation and minimise direct east-west solar exposure.

Structural Engineering

The substructure comprises a raft foundation system resting on M40 grade concrete with waterproofing membrane layers conforming to IS 3370. The superstructure employs a Flat-Plate RCC system combined with a structural shear wall core, designed to IS 456:2000 and IS 1893:2016 (Seismic Zone IV). The buildings are classified as Special Moment Resisting Frames (SMRF) and have undergone third-party peer review by IIT Delhi's Structural Engineering Department.
